

Dear Headteacher

In accordance with the new combined Government guidance from DFE, DCMS and Home Office, SafeToNet, is the mobile application named as a core part of the package of measures and tools recommended to help keep children safe online in response to the COVID-19 crisis.

We are asking for your help in circulating this important information as widely as possible so that teachers and parents are aware of the latest package of measures and tools recommended to help keep children safer online during lockdown.

The link in the [Gov.UK](#) announcement for this offer can be found under the section entitled “Apps to Help Children Stay Safe Online”.

Through this combined offer from the SafeToNet Foundation and the UK Government, SafeToNet, the world-leading cyber-safety app, is now available **free for life to 1 million parents and carers that download it before 1st August 2020.**

We have prepared you a draft communication for parents which is [attached](#).

Here is a [short video](#) that explains how the app works.

If you would like more information, please contact: Daisy Lio, Schools Co-Ordinator via this email address schools@safetonet.com

Please also see the website from [Park House School](#) where you will find a case study, which has successfully integrated this app into its new Year 7 induction programme for September 2020. This was also highlighted in the effective examples of virtual transition identified by ASCL in their Coronavirus Briefing 59 on 10th June 2020.

This information about the DFE, DCMS and Home Office SafeToNet recommendation is being simultaneously shared with all Local Authority Safeguarding Leads.

Thank you in anticipation of your support in promoting this outstanding opportunity with your parent body for the benefit of all young people.

Yours sincerely,
The SafeToNet Education Team
